The Platinum Investment Bond ("Bond") is an investment bond issued by Lifeplan Australia Friendly Society Limited ABN 78 087 649 492 AFSL 237989. Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935 ("Platinum"), is the responsible entity of the Platinum Asia Fund ("PAF"), an underlying investment option of the Bond. The Bond's latest Product Disclosure Statement ("PDS") provides details about the Bond. You can obtain a copy of the PDS from Australian Unity's website www.australianunity.com.au/platinum, or by contacting their Investor Services on 1800 670 638. This information is general in nature and does not take into account your specific needs or circumstances. You should consider your own financial position, objectives and requirements and seek professional financial advice before making any financial decisions. Numerical figures are subject to rounding. Platinum does not guarantee the performance of the Bond or PAF, the repayment of capital or the payment of income. The market commentary reflects Platinum's views and beliefs at the time of preparation, which are subject to change without notice. No representations or warranties are made by Platinum as to their accuracy or reliability. To the extent permitted by law, no liability is accepted by Platinum for any loss or damage as a result of any reliance on this information.

1. & 2. Source: Platinum for PAF returns and Factset Research Systems for MSCI returns. Investment returns are calculated using PAF's NAV unit price (i.e. exclude a buy/sell spread), and represent the combined income and capital returns in the specified period. All returns are pre-tax, net of fees and costs and assume the reinvestment of distributions. The returns are calculated relative to the MSCI All Country Asia ex-Japan Net Index in A\$. The investment returns depicted in the graph are cumulative on A\$20,000 invested in PAF since inception (04 March 2003). **Past performance is not a reliable indicator of future returns.** Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. The "Long %" is PAF's exposure to long securities and long securities/index derivative positions, the "Short %" is PAF's exposure to short securities and short securities/index derivative positions and the "Net %" is the difference between the "Long %" and the "Short %", each as a percentage of the market value of PAF's portfolio. The "Currency %" is the effective currency exposure of PAF's portfolio as a percentage of the market value of its portfolio, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

3. and 4. Country classifications for securities reflect Bloomberg's "country of risk" designations, and currency classifications for securities reflect the relevant local currencies of our country classifications.

4. The "Top ten positions" show PAF's top ten long securities positions as a percentage of the market value of PAF's portfolio (including long securities and long securities derivative positions).

All data where MSCI is referenced is the property of MSCI Limited ("MSCI"). No use or distribution of this data is permitted without the written consent of MSCI. This data is provided "as is" without any warranties by MSCI.

MSCI assumes no liability for or in connection with this data. Please see full MSCI disclaimer in <https://www.platinum.com.au/Special-Pages/Terms-Conditions>

MARKET UPDATE AND COMMENTARY

This commentary relates to the underlying fund, the Platinum Asia Fund.

- The Fund returned 1.7% in June, with positive contributions from Indian and Chinese property developers.
- Investors remain cautious about a Chinese recovery and geopolitical tensions.
- We are focused on finding businesses that have strong long-term growth prospects with attractive valuations.

Market Commentary

China's reopening economic recovery disappoints but could provide an opportunity

Investors' primary concern with China now seems to be weaker-than-expected economic data, eclipsing geopolitical risks and a potential US recession. After starting 2023 on a high note, the market seems to have lost confidence, as the second leg of the reopening rally proved elusive. Disappointing consumer spending during the Dragon Boat holiday and data showing that manufacturing activity had contracted and services were losing steam also hurt sentiment. However, we believe that this could be a buying opportunity, with the increased likelihood of additional stimulus, under-representation in investor portfolios, relative market value compared to history and peers, and the potential for earnings upgrades.

China stimulus has been targeted thus far

Stimulus in China has been targeted to date, with the announcement of 22 measures aimed at reducing costs for businesses and 16 measures to boost exports (source: National Development and Reform Commission). There was also a support package to boost the EV sector, and tax breaks were announced for high-end manufacturing companies. China is a dynamic country with best-in-class sectors that should benefit from targeted stimulus. Take EVs, for instance, investors often forget that China leads the world in terms of EV sales and is now the second-largest exporter of cars, overtaking Germany (source: Statista and Market Research Future, respectively). Chinese companies also dominate battery material refining and battery technology. Platinum's investing philosophy and process is to find mispriced stocks and great long-term opportunities in areas that are out of favour and away from the crowd, and this is the case with the Fund's Chinese investments.

Elsewhere in Asia

Monthly performance in other Asian markets was mixed in June. Indian stocks spiked to record levels on sustained overseas inflows and strong economic data. Taiwan's stock market was led higher by chip stocks, as the sector benefited from a second month of AI chip optimism. In contrast, Korea's stock market rally in May lost steam amid an ongoing slowdown in its exports and the domestic economy, and Thailand's market continued to see capital outflows as the political impasse over its new coalition government continued and its central bank said it expects to continue tightening monetary policy to battle inflation.

Performance Analysis*

The Fund returned 1.7% for the month. Top contributors to June's performance were property developers in India (Marotech Developers) and China (China Resources Land), Chinese electrical appliance manufacturer Midea (after it dropped its takeover bid for Electrolux) and Indian passenger airline InterGlobe Aviation. Detractors included Chinese wealth management company Noah, Philippine property developer Ayala Land and Chinese parcel delivery service ZTO Express.

Valuation

The Fund's aggregate valuation metrics are attractive in both an absolute sense and relative to the market, with a 5% higher earnings yield (see table below). We continue to deploy Platinum's contrarian investment process, which focuses on finding businesses that have better long-term growth prospects but are oversold or out of favour due to temporary setbacks and therefore have attractive valuations.

Metric	Platinum Asia Fund	MSCI AC Asia Ex Japan Index (A\$)
NTM Earnings Yield	8.2% (Price to earnings ratio 12.2x)	7.8% (Price to earnings ratio 12.8x)
NTM Dividend Yield	2.7%	3.1%
NTM Enterprise Value-to-Sales	1.4x	1.1x
LTM Price-to-Book Ratio	1.5x	1.5x

The valuations in the table have been calculated by Platinum and for the Fund refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. As at 30 June 2023. NTM = next twelve months. LTM = last twelve months.

*Source: Platinum. Contribution numbers are based on the total return of individual positions (in AUD) and are gross as they do not take into account the Fund's fees and costs (other than brokerage). **Past performance is not a reliable indicator of future returns.**
