The Platinum Investment Bond ("Bond") is an investment bond issued by Lifeplan Australia Friendly Society Limited ABN 78 087 649 492 AFSL 237989. Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935 ("Platinum"), is the responsible entity of the Platinum Asia Fund ("PAF"), an underlying investment option of the Bond. The Bond's latest Product Disclosure Statement ("PDS") provides details about the Bond. You can obtain a copy of the PDS from Australian Unity's website [www.australianunity.com.au/platinum](http://www.australianunity.com.au/platinum), or by contacting their Investor Services on 1800 670 638. This information is general in nature and does not take into account your specific needs or circumstances. You should consider your own financial position, objectives and requirements and seek professional financial advice before making any financial decisions. Numerical figures are subject to rounding. Platinum does not guarantee the performance of the Bond or PAF, the repayment of capital or the payment of income. The market commentary reflects Platinum's views and beliefs at the time of preparation, which are subject to change without notice. No representations or warranties are made by Platinum as to their accuracy or reliability. To the extent permitted by law, no liability is accepted by Platinum for any loss or damage as a result of any reliance on this information.

1. & 2. Source: Platinum for PAF returns and Factset Research Systems for MSCI returns. Investment returns are calculated using PAF's NAV unit price (i.e. exclude a buy/sell spread), and represent the combined income and capital returns in the specified period. All returns are pre-tax, net of fees and costs and assume the reinvestment of distributions. The returns are calculated relative to the MSCI All Country Asia ex-Japan Net Index in A\$. The investment returns depicted in the graph are cumulative on A\$20,000 invested in PAF since inception (04 March 2003). **Past performance is not a reliable indicator of future returns.** Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. The "Long %" is PAF's exposure to long securities and long securities/index derivative positions, the "Short %" is PAF's exposure to short securities and short securities/index derivative positions and the "Net %" is the difference between the "Long %" and the "Short %", each as a percentage of the market value of PAF's portfolio. The "Currency %" is the effective currency exposure of PAF's portfolio as a percentage of the market value of its portfolio, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

3. and 4. Country classifications for securities reflect Bloomberg's "country of risk" designations, and currency classifications for securities reflect the relevant local currencies of our country classifications.

4. The "Top ten positions" show PAF's top ten long securities positions as a percentage of the market value of PAF's portfolio (including long securities and long securities derivative positions).

All data where MSCI is referenced is the property of MSCI Limited ("MSCI"). No use or distribution of this data is permitted without the written consent of MSCI. This data is provided "as is" without any warranties by MSCI.

MSCI assumes no liability for or in connection with this data. Please see full MSCI disclaimer in <https://www.platinum.com.au/Special-Pages/Terms-Conditions>

### MARKET UPDATE AND COMMENTARY

**This commentary relates to the underlying fund, the Platinum Asia Fund.**

- The Fund returned 4.8% in July and 12.6% over the year.
- The return was driven by strong contributions from consumer discretionary, information technology and industrials.
- We are focused on finding businesses that have strong long-term growth prospects with attractive valuations.

#### Market Commentary

##### **All eyes were on China's Politburo meeting in July**

The Politburo statement from the 24 July meeting acknowledged China's economy was facing new difficulties and challenges, in particular, lacklustre domestic demand and a complex external environment. Members urged the need for proactive fiscal policy and prudent monetary policy (source: Xinhua). Three US cabinet officials visited China during July to calm geopolitical tensions, and President Xi made comments calling for greater international cooperation in terms of trade and investment. The market took this announcement positively, with some economists describing the tone as more dovish than expected (source: Deutsche Bank). Analysts agreed that more stimulus measures seem likely and will be enough to ensure that the government's growth target of "at least 5%" will be achieved (source: FactSet). Chinese stocks recorded their best month since January on rising expectations that stimulus would be forthcoming (source: Bloomberg).

##### **Support for the Chinese property market was the standout**

The standout development cited was the change in language on real estate policy, dropping the mantra that "housing is for living, not for speculation". Chinese property stocks rebounded in late July on the news that authorities are looking to ease housing curbs and stimulate private consumption, with officials in top-tier cities including Beijing, Shenzhen and Guangzhou mulling easing home-buying restrictions in these cities to drive a recovery in property markets (source: SCMP). The Fund has about ~7% exposure to Chinese real estate companies.

Platinum is a contrarian investor; our hunting ground is to look for out-of-favour stocks where the market has overreacted to temporary setbacks or structural change. Even world-class companies with strong long-term growth prospects at attractive valuations that happen to be situated in China still seem to be out of favour with investors, and this is therefore an area where we think the best opportunities are to generate alpha for the long term.

#### **Elsewhere in Asia**

India continues to be the flavour for the month for investors. We think India is a great story both in terms of demographics and macroeconomic indicators, however, it is a well-known story, and we believe it is already reflected in the price. The BSE500 Index is trading on 20x 12-month forward price-to-earnings (PE), the most expensive market in the G20, and reflects the market's expectations of 21% earnings per share (EPS) growth for the next 12 months. This is compared to China (Shanghai A Share Index), which is trading on 9.5x 12-month forward PE with the market expecting EPS growth of 24% (source: FactSet and Credit Suisse).

#### Performance Analysis\*

The Fund returned 4.8% for the month. Top contributors to July's performance included Vietnamese fund manager Vietnam Enterprise Investments, Chinese insurance company Ping An Insurance and Chinese tech company Alibaba. Detractors included Taiwan Semiconductor Manufacturing and Chinese technology company TI Cloud.

#### Valuation

The Fund's aggregate valuation metrics are attractive in both an absolute sense and relative to the market, with a 4% higher earnings yield (see table below). We continue to deploy Platinum's contrarian investment process, which focuses on finding businesses that have better long-term growth prospects but are oversold or out of favour due to temporary setbacks and therefore have attractive valuations.

Metric	Platinum Asia Fund	MSCI AC Asia Ex Japan Index (A\$)
NTM Earnings Yield	7.9% (Price-to-Earnings ratio of 12.6x)	7.6% (Price-to-Earnings ratio of 13.1x)
NTM Dividend Yield	2.6%	3.0%
NTM Enterprise Value-to-Sales	1.5x	1.1x
LTM Price-to-Book Ratio	1.6x	1.6x

The valuations in the table have been calculated by Platinum and for the Fund refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. MSCI data is sourced from Rimes, FactSet and Platinum. As at 31 July 2023. NTM = next twelve months. LTM = last twelve months.

\*Source: Platinum. Contribution numbers are based on the total return of individual positions (in AUD) and are gross as they do not take into account the Fund's fees and costs (other than brokerage). **Past performance is not a reliable indicator of future returns.**
