The Platinum Investment Bond ("Bond") is an investment bond issued by Lifeplan Australia Friendly Society Limited ABN 78 087 649 492 AFSL 237989. Platinum Investment Management Limited ABN 25 063 565 006 AFSL 221935 ("Platinum"), is the responsible entity of the Platinum International Fund ("PIF"), an underlying investment option of the Bond. The Bond's latest Product Disclosure Statement ("PDS") provides details about the Bond. You can obtain a copy of the PDS from Australian Unity's website www.australianunity.com.au/platinum, or by contacting their Investor Services on 1800 670 638. This information is general in nature and does not take into account your specific needs or circumstances. You should consider your own financial position, objectives and requirements and seek professional financial advice before making any financial decisions. Numerical figures are subject to rounding. Platinum does not guarantee the performance of the Bond or PIF, the repayment of capital or the payment of income. The market commentary reflects Platinum's views and beliefs at the time of preparation, which are subject to change without notice. No representations or warranties are made by Platinum as to their accuracy or reliability. To the extent permitted by law, no liability is accepted by Platinum for any loss or damage as a result of any reliance on this information.

1. & 2. Source: Platinum for PIF returns and Factset Research Systems for MSCI returns. Investment returns are calculated using PIF's NAV unit price (i.e. exclude a buy/sell spread), and represent the combined income and capital returns in the specified period. All returns are pre-tax, net of fees and costs and assume the reinvestment of distributions. The returns are calculated relative to the MSCI All Country World Net Index in A\$. The investment returns depicted in the graph are cumulative on A\$20,000 invested in PIF since inception (30 April 1995). **Past performance is not a reliable indicator of future returns.** Platinum does not invest by reference to the weightings of the index. The index is provided as a reference only.

3. The "Long %" is PIF's exposure to long securities and long securities/index derivative positions, the "Short %" is PIF's exposure to short securities and short securities/index derivative positions and the "Net %" is the difference between the "Long %" and the "Short %", each as a percentage of the market value of PIF's portfolio. The "Currency %" is the effective currency exposure of PIF's portfolio as a percentage of the market value of its portfolio, taking into account long and short securities, cash, forwards and long and short securities/index derivative positions. For the "Industry breakdown", index positions (whether through ETFs or derivatives) are only included under the relevant sector if they are sector specific, otherwise they are included under "Other".

3. and 4. Country classifications for securities reflect Bloomberg's "country of risk" designations, and currency classifications for securities reflect the relevant local currencies of our country classifications.

4. The "Top ten positions" show PIF's top ten long securities positions as a percentage of the market value of PIF's portfolio (including long securities and long securities derivative positions).

All data where MSCI is referenced is the property of MSCI Limited ("MSCI"). No use or distribution of this data is permitted without the written consent of MSCI. This data is provided "as is" without any warranties by MSCI.

MSCI assumes no liability for or in connection with this data. Please see full MSCI disclaimer in <https://www.platinum.com.au/Special-Pages/Terms-Conditions>

MARKET UPDATE AND COMMENTARY

This commentary relates to the underlying fund, the Platinum International Fund.

- The Fund rose 0.5% for the month. This brings the one-year return to a solid 14.0% vs. 9.8% for the market*.
- The net invested position remains near historical averages.
- Looking forward, there are exciting opportunities on the long side, but we remain wary of further market weakness.

Market Commentary

After an extraordinary March, markets were relatively calm throughout April, even with the hangover from the US regional bank runs continuing to be felt, with First Republic Bank the latest to collapse in late April. Many commentators are trying to gauge the broad economic impacts if banks further tighten credit availability. US Treasury Secretary Janet Yellen noted during the month that more conservative bank lending would help the Federal Reserve's (Fed) cause for a tighter liquidity environment and its goal to moderate economic growth. Regardless, the labour and construction markets in the US remain incredibly strong as inflation continues to cycle lower (but remains above the Fed's target).

Very strong earnings updates, AI excitement, cost cuts and stock buyback programs saw the market again favour mega-cap technology stocks. This crowding into only a handful of names has meant that for the calendar year to date (CYTD), only 32% of S&P 500 stocks have outperformed the index - the lowest since 1999 (source: Jefferies). Further, two-thirds of the S&P 500's returns for the CYTD are thanks to only five stocks (source: Goldman). The crowding into the large-tech names signals to us a lack of conviction in the current rally and that investors have returned to hiding in mega-cap 'safe' names as the outlook remains very uncertain. The S&P 500 still trades at a very high valuation multiple relative to history and we continue to think there are better investment opportunities elsewhere.

Over the month, we also heard increasing noise surrounding the US debt ceiling. The market seems to be looking through this at the moment, but we believe the noise and brinkmanship will increase as we approach the ceiling sometime in June/July. Our base case is that this will be resolved, as it was in 2011.

Our Chinese positions detracted 0.3% for the month but contributed 1.9% for the year. We continue to believe that China is a much-unloved stock market, and we remain confident in the Chinese businesses we hold. China remains in a different part of its economic cycle from economies in the West, and the government is taking clear steps to stimulate the economy. Chinese consumption and travel continue to rebound while the production side of the economy lags.

We continued to add selectively to financials while rotating some energy exposure during April. Although this month was calm compared to the March quarter, we continue to believe that volatility will return as the decades-long easy money regime normalises. We expect much more divergent markets over the course of 2023, as a complex and uncertain environment creates mispricing in equities. We think this is a great market for active, 'true' investors.

Our net exposure remains at around 70%. We continue to buy stocks that we think offer good value and remain excited by opportunities across decarbonisation, semiconductors, travel, Chinese consumers, financials, and growth industrials. Our short book remains dynamic and aims to protect capital. The composition of the short portfolio continues to have less emphasis on highly valued growth names and more on COVID beneficiaries (e.g. retailers, e-commerce, logistics) that we expect will have weak earnings outcomes in the year ahead.

Performance Analysis**

For the CYTD, our long positions contributed 8.4% to the Fund's return, while our short positions detracted 2.1%. The Fund's CYTD return was driven by a broad array of long positions, with our industrials and travel names being the standouts (MinebeaMitsumi, General Electric, Wizz Air, Airbus, Booking Holdings). Semiconductor names have also been solid contributors (Micron, Infineon Technologies, Samsung Electronics, Microchip).

Valuation

The portfolio's aggregate valuation metrics are attractive in both an absolute sense and relative to the market, with a 38% higher starting earnings yield and a 38% discount on an asset basis (see table below).

Metric	Platinum International Fund	MSCI AC World Net Index (A\$)
NTM Earnings Yield	9.0% (Price-to-Earnings ratio of 11.1x)	6.5% (Price-to-Earnings ratio of 15.3x)
NTM Dividend Yield	3.3%	2.7%
NTM Enterprise Value-to-Sales	1.3x	1.6x
LTM Price-to-Book Ratio	1.6x	2.6x

The valuations in the table have been calculated by Platinum and for the Fund refer to the long portion of the portfolio, exclude negative net earnings and use FactSet consensus earnings. As at 30 April 2023. NTM = next twelve months. LTM = last twelve months.
