

Student Dependant Registration

Is your child 23 or over and eligible to stay on your family cover?

Good news! If your child qualifies as a student dependant, they can remain on your family cover at no extra cost, until they turn 31.

To qualify as a student dependant, your child must be pursuing an approved, full-time course of study or undertaking an apprenticeship, and can't be married or in a de-facto relationship.

To register your child as a student dependant, simply complete and return the Student Dependant Registration Form on the reverse.

You may need to occasionally renew their student registration details, we will communicate with you beforehand if this needs to be done. If you do not register them, they may be removed from your cover. It's also important to notify us if/when their student status changes.

What if your child is not a student dependant?

For dependant children 23 years old or older, who are no longer eligible to remain on your cover as a student dependants, you can consider upgrading your policy to allow them to remain covered until they turn 31, get married, or enter a de facto relationship. Your child will be removed from your policy on their 23rd birthday unless you advise us prior.

If they are removed they should take out their own cover as soon as possible, to continue to enjoy all the benefits health cover offers. To ensure that any waiting periods they have already served on equivalent or lower levels of cover is recognised they must:

- Contact us within 3 months of ceasing to be covered under your membership; and
- Commence their new cover within 30 days of ceasing to be covered under your membership and pay premiums from that commencement date.

We'd be happy to have a chat about the best cover for their individual needs.
