IOOF WealthBuilder Australian Shares Emerging Leaders – Ausbil

- There was an update to the name of the UMF.
- There were wording modifications to the UMF's investment strategy.

Previous disclosure		Updated disclosure
UMF	Ausbil Investment Trusts – Australian Emerging Leaders Fund ARSN 089 995 442 APIR AAP0104AU	Ausbil Australian Emerging Leaders Fund ARSN 089 995 442 APIR AAP0104AU
Investment strategy	The UMF is authorised to utilise approved derivative instruments. It is the intention that investment in derivatives is primarily undertaken for the purpose of managing risk. An additional objective for using derivatives is to achieve the desired investment exposure to assets or securities without buying or selling the underlying assets or securities. In all cases there will be cash and/or underlying assets available to meet the exposure positions of the derivative instruments.	The UMF is authorised to utilise approved derivative instruments. It is the intention that investment in derivatives is primarily undertaken for the purpose of managing risk. In all cases there will be cash and/or underlying assets available to meet the exposure positions of the derivative instruments.

IOOF WealthBuilder Australian Shares Geared – Colonial First State

- There were wording modifications to the UMF's investment strategy.

Previous disclosure		Updated disclosure
Investment strategy	<p>The UMF generally invests in large, high quality companies with strong balance sheets and earnings. The UMF utilises gearing to magnify returns from the underlying investments, whether they are gains or losses. The UMF predominantly invests in Australian companies.</p> <p>Please note: A geared option will not always magnify gains (particularly in a low return environment), but it will magnify losses. Investors will therefore experience increased volatility in the value of their investment. This means that investors will have potentially large fluctuations both up and down in the value of their investments.</p> <p>This UMF uses borrowing or gearing as a central part of its investment strategy. It is managed so that, as far as possible, income from dividends and interest exceeds the cost of borrowing and other expenses. This process of managing income and expenses is called 'dynamic gearing' because the gearing ratio may vary according to market conditions. The gearing ratio is the total amount borrowed expressed as a percentage of the total assets of the UMF. Under dynamic gearing, the gearing ratio is managed at the discretion of the UMF's responsible entity, but usually the maximum amount possible is borrowed, subject to the availability of debt and ensuring that estimated income exceeds estimated expenses. No additional borrowing is made when the gearing ratio is at 55% or above.</p> <p>Whilst the UMF is able to use derivatives primarily to manage risk it does not generally do so.</p> <p>The UMF predominantly invests in Australian companies and therefore does not hedge currency risk. Where it borrows in a foreign currency, proceeds will be fully hedged into Australian dollars.</p>	<p>The UMF generally invests in large, high quality companies with strong balance sheets and earnings. IOOF WealthBuilder Australian Shares Long Short – Perpetual

- There were wording modifications to the UMF's investment objective and investment strategy.

Previous disclosure		Updated disclosure
Investment objective	The UMF aims to provide long-term capital growth and income through investment in quality shares and taking short positions in selected Australian shares.	The UMF aims to provide long-term capital growth and income through investment in quality shares and taking short positions predominately in selected Australian shares.
Investment strategy	<p>The UMF researches companies of all sizes using consistent share selection criteria. The priority is to select those companies that represent the best investment quality and are appropriately priced. In determining investment quality, investments are carefully selected on the basis of four key investment criteria:</p> <ul style="list-style-type: none"> • conservative debt levels • sound management • quality business and • in the case of industrial shares, recurring earnings. <p>In addition, the UMF aims to take short positions in Australian shares that it believes will fall in value. The short positions are determined based on each stock's expected returns and the investment constraints (designed to reduce the risks associated with taking short positions).</p> <p>Derivatives may be used in managing the UMF for a range of investment activities, including but not limited to creating short exposure to a stock, security or market where permitted. The derivatives are mostly exchange-traded derivatives. The UMF may use over-the-counter derivatives.</p>	<p>The UMF researches companies of all sizes using consistent share selection criteria.
